U-Long Selects SmartSilver™ Antimicrobial Protection for Performance Fabric Line

Bellefonte, PA —June 29, 2010— NanoHorizons Inc., a leader in the creation of nanoscale performance additives for textile, health care, and industrial applications, has announced that U-Long High-Tech Textile has chosen SmartSilver™ antimicrobial for its performance textiles. Widetech Ltd., a SmartSilver™ distributor in Taiwan, will provide the SmartSilver™ additive to U-Long's production facilities.

"SmartSilver™ is cutting edge antimicrobial technology that clearly enhances our line of high performance woven fabrics," says Sunny Lin, Sales Manager, U-Long. "SmartSilver™ adds value for our customers and proven performance for their end users. The market wants added features and multiple benefits at a competitive price and with SmartSilver™ we continue to satisfy that demand."

SmartSilver™ antimicrobial additives are available in a range of integration-ready formulations for both natural and synthetic fibers and fabrics. SmartSilver™ provides highly durable, effective protection against bacteria and the odors and material degradation these microbes can cause. SmartSilver™ antimicrobial additives are approved by Oeko-Tex® as free from harmful levels of more than 100 substances believed to be hazardous to human health. The additives are also US EPA registered.

"I am very pleased to be working with U-Long," says Timothy Skedzuhn, VP Textile Business Unit, NanoHorizons Inc. "SmartSilver's advanced technology complements U-Long's high quality technical textiles. They are an excellent partner for developing fabrics that offer meaningful antimicrobial benefits to a demanding market."

U-Long is a preferred fabric supplier to most of the major outdoor performance apparel brands in the US, Europe and Asia. Their fabrics are used in outerwear, performancewear, and equipment as well as in lining materials for footwear and bags.

NanoHorizons and U-Long will be attending Outdoor Retailer Summer Market and will be available in Booth #255-410.
